

SICK CHILDREN

When a child becomes sick on site with vomiting or high temperature, we contact the parents/carers as soon as possible to collect the child.

The child can wait in the quiet area, awaiting their arrival under staff supervision.

Otherwise, we keep an eye on the child; monitor him/her noting any changes on an “Incident Slip” in the First Aid Box.

If a child displays covid symptoms, they should be isolated and the room should be ventilated until a parent/carer can come to pick them up. The person in charge will need to wear PPE: gloves, mask and apron.

The PPE should then be put in a refuse bag, closed, put into another refuse bag, closed and put outside in the disused back yard for 72h and then put in the bin.

This policy was adopted on July 2023

Date to be reviewed July 2024
